shamin.azaz@yahoo.com ■ (240) 899-6636

Security Clearance: Customs and Border Protection, Level 2 – Full CBP BI

Education:

Bowie State University

Bachelor of Science: Computer Technology, GPA: 3.8

INFOSEC Boot Camp

Pursuing CCNA

Prince George's Community College

Associate of Arts: General Studies

Bowie, MD

Currently Enrolled

Remote

Largo, MD

Graduated May 2022

Professional Experience:

The George Washington University Hospital

Information Systems Support Technician

Washington, DC

March 2026 - Present

- Delivered Tier 1/2 IT support for clinical and administrative staff in a fast-paced hospital environment, ensuring rapid issue resolution and minimal downtime.
- Troubleshooting hardware, software, network, VPN, VoIP, printer, scanner, and workstation issues across hospital departments and patient care units.
- Supported enterprise healthcare applications including Cerner/Oracle Health, Epic, Microsoft 365, Citrix, Imprivata, Active Directory, VMware, ServiceNow, UKG/Kronos, PACS, and Pyxis systems.
- Installed, configured, and maintained desktops, laptops, thin clients, mobile devices, printers, scanners, and peripheral equipment for hospital staff.
- Managed Active Directory accounts, MFA, password resets, user provisioning, and group permissions while maintaining HIPAA and cybersecurity compliance.
- Documented, prioritized, escalated, and resolved incidents using ServiceDesk/ticketing systems while meeting SLA targets.
- Performed workstation imaging, software deployment, patching, device encryption, and asset lifecycle management for enterprise hardware refresh projects.
- Supported clinical workflows, EHR access, remote physician connectivity, telehealth platforms, and secure healthcare communication systems.
- Collaborated with infrastructure, cybersecurity, and vendor teams to resolve enterprise system and network issues.
- Assisted with Citrix VDI environments, remote access solutions, wireless connectivity, preventative maintenance, and system health monitoring.
- Supported audiovisual and telehealth technologies for meetings, training sessions, and virtual patient care initiatives.
- Created technical documentation, knowledge base articles, and trained staff on applications, security practices, and troubleshooting procedures.

CACI – Cybersecurity Infrastructure Security Agency

Technology Operations Center

Service Desk Analyst - Senior

Arlington, VA

November 2024 - Dec 2025

- Monitored enterprise network services, responded to alerts and user-reported outages, and escalated network-impacting incidents per established protocols.
- Served as first-line support for network issues submitted via phone, chat, email, and ticketing systems, ensuring accurate logging and follow-through of all incident tickets.
- Documented incident progression, resolution steps, and root cause analysis details in ServiceNow to support SLA compliance and ongoing audit requirements.
- Assisted with change-request processing, user provisioning, and access control updates within Active Directory to maintain operational continuity.

SHAMIN AZAZ

shamin.azaz@yahoo.com ■ (240) 899-6636

Security Clearance: Customs and Border Protection, Level 2 – Full CBP BI

- Supported WAN/LAN troubleshootings by validating connectivity, permissions, and routing dependencies, escalating to Tier II operations when required.
- Ensured high-quality customer experience by communicating incident status updates and conveying technical outcomes clearly to end users and vendors.
- Showcased strong written and verbal communication skills, attention to detail, problem-solving abilities, and a commitment to outstanding customer service.
- Analyzed and resolved complex technical issues escalated by junior-level analysts.
- Utilized remote access tools (e.g., BOMGAR) to troubleshoot and resolve desktop and laptop issues.
- Applied advanced technical knowledge to support tasks such as onboarding/offboarding employees, managing Active Directory user accounts, mapping network drives, and diagnosing software, hardware, and network issues.

CACI – DHS HQ

Oxon Hill, MD

Mid-Tier Analyst

October 2022 — October 2024

- Provide Tier 2/3 technical support to over 10,000 DHS employees and contractors, utilizing ServiceNow to log, monitor, resolve, and escalate tickets.
- Diagnose and resolve escalated incidents and service requests, ensuring timely resolution and end-user satisfaction.
- Administer Active Directory including user account management, password resets, Group Policy, and OU configurations.
- Perform advanced troubleshooting on Windows 11, Microsoft Office Suite, and web browsers (IE, Firefox).
- Utilize BOMGAR for remote support, addressing laptop, desktop, and peripheral issues across distributed environments.
- Support VPN connectivity, shared drive setup, and network troubleshooting.
- Leverage SCCM and other patch management tools to deploy updates and ensure endpoint compliance.
- Apply problem management practices to identify root causes and reduce recurring incidents.
- Actively train and mentor junior analysts; coordinate small technical teams to support service desk functions.
- Collaborate with Service Desk Manager on ticket analysis, performance reviews, and continuous service improvement.
- Communicate effectively with internal teams and third-party vendors to maintain seamless operations and timely issue resolution.
- Maintain eligibility for DHS Entry on Duty (EOD) clearance.

Q-Base Corp/TYTO – US Customs & Border Protection

Springfield, VA

Service Desk Analyst & Joint Accountabilities and Communication

September 2019 — July 2023

- Delivered Tier I support for CBP systems and services, resolving issues related to accounts, remote access (RSA), Exchange email, and mobile device management.
- Performed account administration within Active Directory and CBP mainframe systems.
- Provided support for CBP-approved desktop, network, and web-based applications.
- Used Windows Server tools and Microsoft Remote Desktop to support workstations and remote users.
- Installed, configured, and repaired hardware (printers, scanners, cameras, etc.) and deployed software updates.
- Diagnosed network connectivity issues and ensured high availability of LAN/WAN infrastructure.
- Logged incidents in Remedy, maintained accurate documentation, and ensured timely communication and updates to end users.
- Conducted IT onboarding and training for new staff, and created SOPs to support knowledge transfer.
- Supported compliance initiatives, including nationwide security reviews and implementation of NDA and AirWatch mobile device policies.
- Participated in security working groups to stay aligned with Federal and Department-level cybersecurity standards.

- Generated analytics reports from Remedy to identify issue trends and inform staff training efforts.
-

Technical Skills

- **Tools/Platforms:** ServiceNow, Remedy, SCCM, BOMGAR, CSOM, AirWatch, Microsoft Remote Desktop
 - **Systems:** Windows 10/11, Windows Server 2003/2008, Active Directory, VPN, Exchange Server
 - **Networking:** LAN/WAN troubleshooting, RSA token support, shared/network drive mapping
 - **Security:** NDA compliance, DHS & CBP security policies, system access controls
 - **Software:** Microsoft Office Suite, CBP-standard and DHS-specified applications
 - **Other:** Strong documentation, training, and team coordination abilities
-

Networking Skills

- TCP/IP, DNS, OSI Model, VLAN Configuration, Cisco Routers/Switches, Juniper Devices, OSPF, EIGRP, BGP, Firewall Rule Validation, VPN Connectivity, F5 Load Balancers
